Enjoy a leisurely morning at sea learning about Iceland and its incredible biodiversity. Join your expedition staff on the bow of the ship as you keep watch for the close to 20 whale species that call the Westfjords home. Spend the afternoon on the remote eastern side of the Westfjords, an area difficult to access but boasting spectacular beauty and rich history. The tiny town of Djupavik held its place on the map because of the golden age of herring. During its heyday in the 1930s, its herring plant was the largest concrete structure in Iceland. The plant closed in 1954 but remains as a small museum and a memory of the rich productivity of the herring industry in Iceland. Visit the museum and learn about the significance of this resource to all of Iceland in the 20th century.

Take a float trip on the Jokulsa river or visit a historic rural turf farm to understand rural life in Iceland. Finally, learn about Grettir the Strong and the saga named after him by exploring Drangey Island and spotting the multitudes of birds that call the island home like kittiwakes, shearwaters and possibly even ravens and gyrfalcons.
