

ICELAND'S WESTFJORDS & NORTH COAST 9 DAY EXPEDITION CRUISE

Welcome to Aurora Expeditions' Iceland's Westfjords & North Coast Discovery voyage.

Geologically, Iceland is one of the youngest countries on Earth. It's a land of spectacular geology that is rich in wildlife, culture and human history. On this voyage, you'll explore Westfjords, one of the remotest and most pristine regions in Iceland--ideal for nature hikes and bird and whale viewing. Discover diverse landscapes including thundering waterfalls, lava fields that breath steam and verdant valleys that stretch beyond the horizon. In Husavik, keep your eyes and cameras ready to catch the fluke of a whale tail as it takes a deep dive. Atlantic puffins can be found in large numbers in Iceland, and you'll have many opportunities to encounter these charismatic birds nesting in their burrows.

Note: In order to experience some of the incredible scenery of Iceland, a number of the shore excursions on this itinerary require coach travel away from the coast.

ITINERARY

Day 1 Arrive Reykjavik

Having made your way to Reykjavik, you will be met by a representative of Aurora Expeditions and transferred to our group hotel. Upon arrival at your included hotel, please visit the Aurora Expeditions hospitality desk to collect your luggage cabin tags and to speak with our ground operations team, who may have information to share with you about pre-embarkation or to provide

Wild Earth Travel

Small Ships, Big Adventures

wildearth-travel.com

info@wildearth-travel.com

you with information about where to dine, withdraw cash or purchase last minute items from a local pharmacy or supermarket.

The remainder of your time is at leisure. All meals today are at your own expense.

Accommodation: Fosshotel Reykjavik Hotel (or similar)

Day 2 Embarkation Day

Breakfast and check-out. Join our guided Golden Circle and Geothermal Energy tour. With 85% of its electricity sourced from renewable sources, Iceland sets an outstanding example when it comes to sustainable energy.

Our journey takes us to the famous seismic sights of the Golden Circle route - Gullfoss waterfall, geysir, and history-rich Thingvellir National Park, before we experience first-hand how green, sustainable energy is produced at one of the largest single-site geothermal power plants on the planet at the Geothermal Energy Exhibition and Ljosafossvirkjun Power Station.

We'll also spend time at a true eco-village. Powered with thermal and solar energy, Solheimar is fully sustainable, boasting greenhouses and forestry programmes, while its sustainable workshops are dedicated to candle-making, carpentry, weaving and soap-making. Late afternoon we return to Reykjavik for embarkation.

This evening, get to know your fellow expeditioners, expedition team and crew.

Day 3 - Arnarstapi / Grundarfjordur

At Arnarstapi, our Zodiacs tender us ashore. Located on the Snaefellsnes Peninsula, this area features diverse landscapes characterised by lava fields, glistening fjords and home to Breidafjörður Bay which is rich in birdlife. The area is crowned by the magnificent, ice-capped Snaefellsjökull volcano, a 700,000-year-old dormant subglacial volcano, visible from Reykjavik on a clear day and immortalised in Jules Verne's Journey to the Centre of the Earth. You can choose from a selection of shore excursion options that best suits your interests and level of fitness. Options include a bus tour to Mount

Kirkjufell, one of the most famous mountains in Iceland, or a choice of hikes including a glacier hike at Snaefellsjökull Glacier.

Day 4-5 Westfjords

Over the next two days, we explore the Westfjords region featuring outstanding landscapes with jaw-dropping views of dramatic fjords carved by ancient glaciers, sheer table mountains that plunge into the sea and pristine North Atlantic vegetation.

At Patreksfjörður, a shore excursion by coach takes us to Latrabjarg cliffs. As Europe's largest bird cliff, Latrabjarg is home to millions of seabirds, such as puffin, razorbill, fulmar and guillemot. Enjoy the impressive variety of natural wonders and unspoiled nature. Latrabjarg also happens to be the westernmost point in Europe, east coast of the North American continent on the other side of the Atlantic. Alternatively, enjoy a shore excursion by coach to Rauthasnduris to explore the beach and seal watching.

At Dynjandi, witness one of Iceland's most impressive waterfalls - a difficult feat in a country that is filled with spectacular cascading falls.

Day 6 Husavik & Akureyri

Arrive in Husavik, the whale watching capital of Iceland. Choose from a selection of shore excursions to best suit your interests and level of fitness. Choose to visit Godafoss Falls and soak at Myvatn Nature baths, an outdoor hot spring bathing complex surrounded by mountain views. Alternatively, explore both Godafoss and Dettifoss waterfalls, the Mývatn region and Krafla.

In the evening, we reboard our vessel in Akureyri, Iceland's second largest city outside the capital area and is blessed with a superb snow-capped mountain backdrop.

Day 7 Siglufjörður

Wild Earth Travel
Small Ships, Big Adventures

info@wildearth-travel.com | wildearth-travel.com

Siglufjörður is the northernmost town on Iceland's mainland and is a historic fishing town whose fortune has been closely linked to the success of the fishing industry. It's an area of spectacular natural beauty surrounded by mountains and the fjord. In the morning, our expedition team will lead you on a guided hike suited to your level of fitness. After lunch, you'll have free time to explore this quaint town at your leisure, visiting the numerous galleries, museums, artisanal workshops and local church. If we're lucky, we might get to taste some local beer.

Day 8 Vigur Island

On Vigur Island, birdwatchers can try and tick a few species on their list, while others can enjoy walks and hikes of varying levels of difficulty, soaking in the stunning surrounds.

Day 9 Disembark Reykjavik

During the early morning, we cruise into Reykjavik and disembark at approximately 8.00 am. Farewell your expedition team and fellow passengers as you continue your onward journey. Transfer to Keflavik airport or to your centrally located hotel.

****Note:** We do not recommend booking flights departing prior to 12.00 pm on the day of disembarkation, as we may experience delays at the conclusion of the voyage.**

Please Note:

In true expedition style we encourage exploration and adventure, offering flexibility in challenging environments in a way that puts you among the action to see and do as much as possible. This itinerary is only a guide and subject to change due to ice and weather conditions.

YOUR SHIP: SYLVIA EARLE

YOUR SHIP:	Sylvia Earle
VESSEL TYPE:	Luxury Expedition
LENGTH:	104 meters
PASSENGER CAPACITY:	126
BUILT/REFURBISHED:	2020/2021

Due to sail in October 2021 our new ship honours the highly accomplished marine biologist, oceanographer and explorer, Sylvia Earle. As the first female chief scientist of the U.S. National Oceanic and Atmospheric Administration, and named by Time Magazine as its first Hero for the Planet in 1998 - this vessel pays tribute to Sylvia's long standing conservation efforts for marine protected areas and ocean wildlife. Sylvia Earle will be actively involved in the development of her namesake.

Designed for rugged, remote areas Crossing the notorious Drake Passage or the Denmark Strait, our expeditions face some of the most intense conditions nature can throw at us. The Sylvia Earle is at the cutting edge of nautical technology: robust, powerful and up to the task.

Ulstein X-BOW® & Lounge The streamlined Ulstein X-BOW® cuts through the swell so you feel fewer vibrations and disturbances, and makes quicker transits through waves. It also helps reduce our fuel consumption by up to 60%^. Experience the Glass Atrium Lounge inside the bow, featuring huge windows and superb views to the front of the ship.

Swimming pool & wellness centre In between landings, enjoy the heated saltwater open air swimming pool and jacuzzis on

board the Sylvia Earle and watch the world go by, or experience our gym, sauna or enjoy a massage (additional cost) in the Wellness centre.

Safety features The Sylvia Earle will feature industry-leading safety technology that exceeds the requirements for a ship of this size with a world class return-to-port equipment, which duplicates the propulsion system, enabling the ship to maintain operating systems and comfort in the event of engine failure. The ship will also feature a fully-stocked medical clinic designed for use in remote areas.

Responsible travel features We believe that preserving and protecting the environment is of the utmost importance and this is reflected in several features of the Sylvia Earle. The Sylvia Earle will boast one of the lowest polluting marine engines in the world due to low energy consumption, high fuel-efficiency and a streamlined design to deliver an 80% reduction in emissions. The ship can also utilise virtual anchoring to hold its position using a combination of GPS, steering technology, propellers and thrusters. This protects the sea floor and minimises the damage caused by conventional anchors.

Zodiac launching platforms Our ships carry many Zodiacs, which you can board via four dedicated, sea-level launching platforms. These platforms make boarding the Zodiacs as quick, efficient and safe as possible, minimising wait times and getting you closer to the action for longer. Whether you're Zodiac cruising through awe-inspiring fjords in search of wildlife or making a quick transit from ship to a shore landing site, these sturdy crafts will play an integral role in your expedition experience.

Activity preparation area We offer a range of add-on adventure

Wild Earth Travel

Small Ships, Big Adventures

wildearth-travel.com

activities from kayaking and diving to climbing and ski touring, and your ship is designed to support these activities, making the transition from ship to sea or shore as smooth as possible. We built the spacious activity preparation areas and loading platforms in consultation with our expert activity guides. You will also have access to lockers and rapid drying areas for dry suits and wet suits, to give your gear the best chance to dry between excursions.
