Day 2 Bear Island

The greatest bird cliff in the Barents Sea is on Bear Island, or Bjørnøya, Svalbard's southernmost island. Atlantic puffins, northern gannets, glaucous gulls, great skuas, black-legged kittiwakes, little auks, common guillemots, and Brunnich's guillemots, nest on the steep cliffs near Kapp Kolthoff, south of Sørhamna. The ocean has sculpted sea stack rock columns, sea caves and tunnels, with a notable tunnel at Perleporten.

Days 3-8 Svalbard

Svalbard is the kingdom of the polar bears, deep in the Arctic Circle, featuring varied polar landscapes and gargantuan glaciers. Beyond magnificent fjords in the north, the remaining sea ice serves as prime hunting grounds for polar bears. Closer to Longyearbyen, tundra and beaches replace snow and ice. Alongside 600 polar bears, this Arctic hotspot is home to walrus, Svalbard reindeer, ringed seals and arctic fox

Only Svalbard stands between here and the North Pole. Along the coast, Atlantic puffin colonies and

over a million seabirds nest, including arctic skuas, razorbills, northern gannets, white-tailed eagles, common eider ducks and great cormorants.

Cruising to North Cape promises an awe-inspiring encounter with nature's grandeur and a glimpse into the Arctic's captivating allure. In summer, North Cape basks in the ethereal glow of the midnight sun, a surreal phenomenon where the sun never fully sets.
