WILD LANDSCAPES OF WEST GREENLAND EXPEDITION

Welcome to Aurora's Wild Landscapes of West Greenland expedition.

Home to the northernmost capital in the world, Nuuk, the west coast of Greenland may be the most inhabited part of the world's largest island, but you're unlikely to encounter many people outside of Nuuk. With no road to connect the townships, flying or sea travel are the only options available. The further north we venture along the west coast, the smaller and more isolated the settlements become. We push through the sea ice, calved from the enormous Greenland ice sheet to where few tourists venture, to explore hidden bays glittering with icebergs and where whales may shelter.

Note: On this voyage, we visit remote Inuit hamlets and settlements, where the local Inuit people still practice traditional hunting methods including whaling that some people may find confronting. If you find yourself feeling upset and disturbed by what you see, please alert a member of the expedition team immediately, who will do their best to address your concerns and take action to mitigate the problem, wherever possible. _

ITINERARY

Day 1 Toronto

Having made your way to Toronto, check in at our group hotel located near the airport for an overnight stay. At our welcome briefing this evening, enjoy a drink and meet fellow expeditioners. Please visit the Aurora Expeditions hospitality desk to collect your luggage cabin tags and to speak with our ground operations team, who may have information to share with you about

pre-embarkation procedures and also the charter flight to Nuuk tomorrow. You will receive Aurora Expeditions cabin tags for your luggage. Please clearly label the tags with your name and ship cabin number.

Accommodation: Westin Toronto Airport Hotel (or similar)

Day 2 Embarkation, Nuuk

Please ensure that your luggage is fitted with cabin tags clearly labelled with your name and cabin number. Any valuables or personal items should be kept on you throughout the day. Your luggage will be delivered to your cabin ahead of your arrival on board.

After breakfast at the hotel, board our charter flight to Nuuk, where the Sylvia Earle awaits. After boarding, there is time to settle into your cabin before our important safety briefings. This evening, meet your expedition team and crew.

Day 3 Sisimiut

Greenland's second largest town, Sisimiut is located approximately 54 kilometres (33.5 miles) north of the Arctic Circle, meaning that during summer, you can experience the midnight sun here. The town is famous for the old blue church with the gate made of whale bone. In the cosy museum next door to the church, you will find an excellent reconstruction of an Inuit turf house as well as exhibits of local history and early life in Greenland.

Sisimiut offers hiking trails with various degrees of difficulty. The easier trails take you through the town itself, its outskirts and into the mountains, where you will find spectacular vantage points.

Some 4,500 years ago, the Saqqaq culture arrived from Canada and settled in the area. They lived here for approximately 2,000 years, after which they mysteriously disappeared from the area. The Dorset culture arrived around 500 CE and stayed until the 1200s until they were replaced by the Thule culture, and today, most of the population of Sisimiut are descendants of the Thule culture.

Day 4 Qeqertarsuaq (Disko Island)

This compelling island seems to have more in common with Iceland than Greenland. While most of the interior is mountainous and glaciated, its beautiful shorelines boast black sandy beaches, unusual basalt columns, hot springs and dramatic lava formations. We plan to appreciate the colourful flowers on the Kuannit Hike, where you can walk stunning landscapes, see ancient basalt columns and perhaps spot whales in Disko Bay.

Days 5-7 Expedition cruising

Note: In genuine expeditionary style, our itinerary for the following days is heavily dependent on weather conditions and unpredictable sea ice. The following places are some that we hope to visit.

Uummannaq

Set on an island of the same name, Uummannaq is located 600 km (373 mi) above the Arctic Circle and is famous for its heart-shaped mountain. It's also well-known for the Qilakitsoq mummies, Greenland's oldest, that were discovered in nearby. The centre of town is compact and easy for you to explore independently, and there are several marked hiking trails, many of which lead to mountain lakes, for those who want to stretch their legs. Kayakers can enjoy paddling among the icebergs and keeping watch for whales that frequent the area.

Upernavik

Set amid a labyrinth of small islands, Upernavik is home to traditional settlements and enormous icebergs that Greenland is famous for. Kayakers can paddle in the serene bay among the glittering icebergs while other expeditioners can discover the town on walks or hike in the surrounding area. Upernavik is the world's northernmost open-air museum. A walk through the old part of town, which encompasses the original colonial buildings, tells the cultural history of the area, including the colonial and Viking periods. Keep a look out for a traditional old kayak and umiaq boat, which highlights the main mode of transport used by locals to navigate the archipelago during summer. The shy and elusive narwhal is also known to visit the area, and at nearby

wildearth-travel.com

info@wildearth-travel.com

Apparsuit, bird enthusiasts will be thrilled to find one of the world's largest bird cliffs.

Day 8 At Sea

Find a spot in one of our many observation lounges and enjoy the spectacular surrounding landscapes. Our talented and knowledgeable expedition members will present informative and entertaining talks about the region that you're travelling through.

Day 9 Qeqertarsuaq, Disko Island

In Qeqertarsuaq, we enjoy a Zodiac excursion in Disko Bay that's often filled with icebergs and is a hotspot for marine life including humpback, fin, minke and bowhead whales. Enjoy a walk through the settlement, perhaps try some local tea made from fresh local herbs, learn about the history of Qeqertarsuaq at the museum before walking along the black sand beach towards the colourful colonial buildings.

Days 10-11 Ataa Sund, Ilulissat

Known as the 'birthplace of icebergs', this region produces some of the most dazzling icebergs found anywhere on earth. We explore ice-filled Ataa Sund and hope to experience a few of the active glaciers from a safe distance. In Ilulissat, we visit the UNESCO World Heritage-listed Icefjord and stand in awe at its immensity. Sermeq Kujalleq, also known as Jakobshavn Glacier, is the most productive glacier - not only in Greenland but the entire Northern Hemisphere. It produces 20 million tonnes of ice each day, all floating into the Ilulissat Icefjord and Disko Bay..

Ilulissat optional helicopter flight (90 mins): this excursion is the only way you can get close to the gigantic glacier. The 10-seater helicopter departs from Ilulissat Airport sweeping over hills, lakes and ice fjords. On the return flight to Ilulissat, fly above the edge of the glacier with breathtaking views of the

massive icebergs drifting in the fjord. The views of some of the largest icebergs that become stranded on a moraine underneath the water, just outside the town, offers a wonderful finale to this excursion. Please note that this excursion requires a minimum of 8 passengers to operate.

Day 12 Aasivissuit - Nipisat UNESCO World Heritage site

We hope to visit a Greenlandic settlement located near the Aasivissuit-Nipisat UNESCO World Heritage Site, a place where the local inhabitants live a traditional fishing and hunting lifestyle that dates back 4,000 years. The settlement also features the remarkable Qaammat Pavilion, built on the ridge at the top overlooking the Ikeertoq fjord. This stunning architecturally designed and award-winning crystal structure was created by Swedish architect, Konstantin Ikonomidis, in cooperation with the local community and the UNESCO team. It is a tribute to nature, the land and cultural traditions of the indigenous Inuit people.

Day 13 Eternity Fjord

Evighedsfjorden, or Eternity Fjord, is one of the more spectacular fjord complexes in west Greenland due to its forested landscape. Hike through a forested valley, witness hills become towering snow-capped mountains as countless glaciers pour down from sheer cliff walls. Occasionally, the thunderous sound of a calving glacier breaks the silence in a place where you are unlikely to see another soul.

Day 14 Disembark in Nuuk, Fly to Toronto

In Nuuk, the capital of Greenland, farewell the crew and expedition team, and transfer to the airport for our charter flight to Toronto for an overnight stay.

Accommodation: Westin Toronto Airport Hotel (or similar)

YOUR SHIP: SYLVIA EARLE

| | |
|----------------------------|--------------------------|
| YOUR SHIP: | Sylvia Earle |
| VESSEL TYPE: | Luxury Expedition |
| LENGTH: | 104 meters |
| PASSENGER CAPACITY: | 126 |
| BUILT/REFURBISHED: | 2020/2021 |

Due to sail in October 2021 our new ship honours the highly accomplished marine biologist, oceanographer and explorer, Sylvia Earle. As the first female chief scientist of the U.S. National Oceanic and Atmospheric Administration, and named by Time Magazine as its first Hero for the Planet in 1998 - this vessel pays tribute to Sylvia's long standing conservation efforts for marine protected areas and ocean wildlife. Sylvia Earle will be actively involved in the development of her namesake.

Designed for rugged, remote areas Crossing the notorious Drake Passage or the Denmark Strait, our expeditions face some of the most intense conditions nature can throw at us. The Sylvia Earle is at the cutting edge of nautical technology: robust, powerful and up to the task.

Ulstein X-BOW® & Lounge The streamlined Ulstein X-BOW® cuts through the swell so you feel fewer vibrations and disturbances, and makes quicker transits through waves. It also helps reduce our fuel consumption by up to 60%^. Experience the Glass Atrium Lounge inside the bow, featuring huge windows and superb views to the front of the ship.

Swimming pool & wellness centre In between landings, enjoy the heated saltwater open air swimming pool and jacuzzis on

board the Sylvia Earle and watch the world go by, or experience our gym, sauna or enjoy a massage (additional cost) in the Wellness centre.

Safety features The Sylvia Earle will feature industry-leading safety technology that exceeds the requirements for a ship of this size with a world class return-to-port equipment, which duplicates the propulsion system, enabling the ship to maintain operating systems and comfort in the event of engine failure. The ship will also feature a fully-stocked medical clinic designed for use in remote areas.

Responsible travel features We believe that preserving and protecting the environment is of the utmost importance and this is reflected in several features of the Sylvia Earle. The Sylvia Earle will boast one of the lowest polluting marine engines in the world due to low energy consumption, high fuel-efficiency and a streamlined design to deliver an 80% reduction in emissions. The ship can also utilise virtual anchoring to hold its position using a combination of GPS, steering technology, propellers and thrusters. This protects the sea floor and minimises the damage caused by conventional anchors.

Zodiac launching platforms Our ships carry many Zodiacs, which you can board via four dedicated, sea-level launching platforms. These platforms make boarding the Zodiacs as quick, efficient and safe as possible, minimising wait times and getting you closer to the action for longer. Whether you're Zodiac cruising through awe-inspiring fjords in search of wildlife or making a quick transit from ship to a shore landing site, these sturdy crafts will play an integral role in your expedition experience.

Activity preparation area We offer a range of add-on adventure

Wild Earth Travel

Small Ships, Big Adventures

wildearth-travel.com

info@wildearth-travel.com

activities from kayaking and diving to climbing and ski touring, and your ship is designed to support these activities, making the transition from ship to sea or shore as smooth as possible. We built the spacious activity preparation areas and loading platforms in consultation with our expert activity guides. You will also have access to lockers and rapid drying areas for dry suits and wet suits, to give your gear the best chance to dry between excursions.
